

# Edge Visualization Solutions

## Enabling Visual Experiences and Interactivity

- / Overview
- / Product Offerings
- / Case Studies
- / Product Selection

The central focus is a large circular graphic containing the text "Edge+ Visualization". The background features several scenarios demonstrating the technology:

- A woman in a blue shirt is interacting with a large touchscreen kiosk.
- A man in a plaid shirt is interacting with a large digital display board showing a graph.
- A woman in a hat and patterned dress is standing in a store, with a red box highlighting her face and demographic information: "Sophie, Gender : Female, Age : 25, Temp. : 36°C".
- A woman is on a video conference call with multiple participants.
- A woman in a white shirt and mask is walking through a train station platform, with a digital board showing temperatures: 37.2 °C, 37.7 °C, and 37.3 °C.
- A woman in a mask is being tracked by a thermal camera at a subway entrance.
- A large digital board at a train station displays flight information.

# Visualize the World Using Digital Signage

Immersive cloud computing and AI technologies are making digital signage more connected, interactive, and personalized. Advantech develops comprehensive edge visualization solutions that deliver compelling visual experiences and interactivity from the edge to the cloud. Our solutions can be found in fast-food, retail, transportation, banking, and education applications; and comprise digital signage players, SignageCMS content management software, DeviceOn device management software, FaceView AI facial recognition, and edge servers. Advantech's edge-to-cloud visualization solutions reduce development expenditures and time-to-market.

## Edge Cloud

Advantech Edge Cloud solution provides a secure, reliable on-site server capable of local hosting and maintenance. It also supports important customer and operation information processing.

## Device Management

Advantech DeviceOn supports sensor/camera data collection, transmission, and storage. Users can also manage and control digital signage via remote KVM functions.

## Content Management

WISE-PaaS/SignageCMS enables easy content layout editing, scheduling, and dispatching. Its up-to-date scheduling function allows real-time information and advertising campaign management.

## AI Facial Recognition

FaceView provides a 99.7% accuracy rate in TAR@ 1E-4, real-time facial recognition; and mask and body temperature detection features.

## Smart Whiteboard and Conference Signage

Companies seek to improve communication efficiency through skill and knowledge sharing while reducing operational costs. A leading total display solutions provider used Advantech's DS-200 smart display module to provide smart whiteboard and conference signage in limited space environments. DS-200 provides an audio, visual, and touch enabled system that facilitates communication, idea generation, and video conferencing. It also saves on installation and on-site maintenance.

### Benefits

- Slot-in design for easy installation
- Modular design adaptable to different needs
- Supports up to three independent displays

### System Diagram

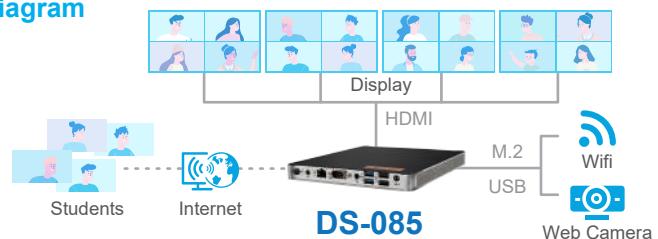

## Future-proof Remote Classroom

The pandemic has forced schools to embrace remote learning technology. DS-085 enables virtual classrooms by connecting to four video streams and delivering an easy-to-integrate slim design. DS-085 empowers new levels of engagement and participation in distanced learning.

### Benefits

- Supports up to 4 displays
- Slim design for easy installation
- Fanless thermal solution for reliability and quiet operation

### System Diagram

## Retail Signage for Smart Targeting and Analytics

The customer combines in-store digital signage with computer vision to improve business intelligence. Advantech's DS-066 delivers advertisements and analyzes audiences according to gender and age. It also calculates the length of time someone views an ad. The preloaded content management software, WISE-PaaS/SignageCMS, allows users to manage and arrange advertisements with a user-friendly interface.

### Benefits

- Powerful computing abilities
- Built-in content management software
- Industrial, fanless, and cable-free design for 24/7 operation

### System Diagram

## Flight Information Display Systems

FIDS utilizes multiple monitors to deliver current information and services to passengers. Advantech's DS-780 conveys flight information using up to three independent displays, and provides advertisement space with minimal downtime. It supports HEVC video decoding for better compression ratios that require less storage space. In addition, its industrial design supports 24/7 operation.

### Benefits

- Advanced graphics engine with Intel® HD 520
- Supports three HDMI displays
- Linux OS improves stability and security
